

Office Memorandum • UNITED STATES GOVERNMENT

TO : Chief of Logistics
THRU : Deputy Chief of Logistics
FROM : Acting Chief, Inspection & Review Staff

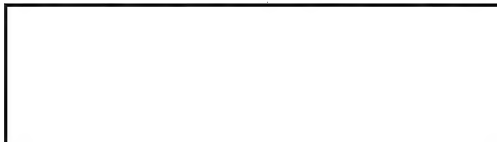

DATE: 24 November 1953

SUBJECT: Logistics Problem Areas

CONFIDENTIAL

1. Attached are statements of logistics problems encountered during the O & M Service survey of SR, WE and WH Divisions. Inasmuch as this Staff participated in the survey only to the extent of furnishing technical advice and assistance, statements made by area division representatives have not been fully investigated as to their validity. It is believed, however, that the attitudes and opinions of area division personnel relative to logistics problems in general and service furnished by the Logistics Office in particular are significant. Objective self-examination instigated by external criticism is one positive means for improvement in our operations.

2. Attached statements are not intended to reflect unfavorably upon any organization or individual. Statements have been discussed with Logistics Office personnel concerned and a summary of reactions obtained is provided.
